VOLUME 3, ISSUE No. 1–4

Cell Biochemistry and Function

ISSUE No. 1 JANUARY 1985

Editorial 1

The Effect of Various Aldehydes on the Respiration of Rat Liver and Hepatoma AH-130 Cell, **R. A. Canuto, M. E. Biocca, G. Muzio, R. Garcea and M. U. Dianzani** 3

Effect of Methylglyoxal on Tumour Microtubular Protein, **A. Miglietta, G. Bonelli, N. Vironda and L. Gabriel** 9

Characterization of Insulin Uptake into Subcellular Fractions of Perfused Rat Liver using Two Different Iodinated Tracers, **J. R. Christensen, G. D. Smith and T. J. Peters** 13

Iodide Accumulation into Thyroid Golgi Vesicles, **P. Bastiani and J. B. Rognoni** 21

Stimulation by Cholera Toxin of ADP-Ribosylation of Membrane Proteins, Adenylate Cyclase and Insulin Release in Pancreatic Islets, **M. Svoboda, P. Garcia-Morales, S. P. Dufrane, A. Sener, I. Valverde, J. Christophe and W. J. Malaisse** 25

Alpha-Lactalbumin as a Lysosomal Enzyme-Releasing Factor, **S. Komine, K. Nakanishi, T. Anzai and A. Yoshimoto** 33

Process of the Combination of α-Lactalbumin with Lysosomes in Mammary Epithelial Cells, **S. Komine, K. Nakanishi, T. Anzai and A. Yoshimoto** 41

A Catabolin-like Factor from Porcine Kidney, **A. J. Monserrat and J. T. Dingle** 45

Specificity of Kirkman-Robbins Hepatoma Non-histone Chromatin Proteins: Electrophoretic and Immunological Analyses, **W. M. Krajewska, Z. Kiliańska, A. Lipińska and L. Klyszejko-Stefanowicz** 53

Incorporation of Antigen ^{125}I IgG into Particular Cell Compartments: Binding by Chromatin, **E. M. Rakowicz-Szulczyńska and A. Horst** 61

Phospholipids in Plant and Animal Chromatin, **M. P. Viola-Magni, P. B. Gahan and J. Pacy** 71

ISSUE No. 2 APRIL 1985

Fibronectin Assays and Their Clinical Application: A Review, **B. J. Boughton** 79

Triiodothyronine Receptor Sites in Serum-Free Cultured Hepatocytes from Adult Rat Liver, **F. Goglia, G. Gallo, S. Palmero, A. Voci and E. Fugassa** 91

Induction of Plasma Membrane Alkaline Phosphatase in Rat Liver, **O. Bachs, C. Enrich, M. Soriano, R. Piñol and J. Domingo** 95

Increased Myosin Orientation during Muscle Contraction: A measure of Cardiac Contractility, **J. Chayen, L. Bitensky, M. V. Braimbridge and S. Darracott-Cankovic** 101

The Interaction of Tumour-Localizing Porphyrins with Collagen, Elastin, Gelatin, Fibrin and Fibrinogen, **M. A. El-Far and N. R. Pimstone** 115

Lysosomal Enzymes in Human Platelets, **G. Leoncini, F. Balestrero and M. Maresca** 121

VOLUME CONTENTS

(Na-K)ATPase Activity along the Nephrons in Normal and Adrenalectomized Rats measured by Quantitative Cytochemistry, **J. Snarski, A. Snarski, M. Bachelet, C. Bader and A. Ulmann** 127

Partial Immunochemical Identity Between ($Na^+ + K^+$)-ATPase and a Membrane Component Extractable with Chloroform: Methanol, **J. S. Addis, K. M. Tenbarge and R. J. Barrnett** 133

Studies on Mechanisms of Ornithine Decarboxylase Activity Regulation in Regenerating Liver, **M. F. Zuretti, E. Gravela, F. Papino and L. Sartorio** 139

Improved Rapid Autoradiography with Elimination of Background, **C. Spiridonidis, A. Raza, S-C. Zhao and H. D. Preisler** 147

Utility and Sensitivity of Anti BrdU Antibodies in Assessing S-Phase Cells compared to Autoradiography, **A. Raza, K. Ucar, R. Bhayana, M. Kempski and H. D. Preisler** 149

Book Review 155

ISSUE No. 3 JULY 1985

Thiols and Pancreatic β-Cell Function: A Review, **H. P. T. Ammon and M. Mark** 157

Stimulation by Glucose and Carbamylcholine of Phospholipase C in Pancreatic Islets, **P. C. F. Mathias, L. Best and W. J. Malaisse** 173

Human Bone Cell Cultures: A New Model for Studying the Mechanism of Action of Calcitonin, **G. Fano, M. Maurizi, G. Venti-Donti, G. Paludetti, E. Donti and G. Della Torre** 179

Hormone-Independent Polyamine Metabolism of Squamous Cell Carcinoma of the Prostate, **G. S. Shukla and R. L. Singhal** 185

The Interaction between Gluconeogenic Metabolism and Accumulation of Phosphate by Chick Kidney Tubule Cells, **M. F. Grahn, R. Parveen and P. J. Butterworth** 193

Rat Gastrointestinal Transglutaminase: Demonstration of Enzyme Activity and Cell and Tissue Distributions, **E. K. Patel, S. E. Bruce, I. Bjarnason and T. J. Peters** 199

Morphological Changes in CHO and VERO Cells Treated with T-2 Mycotoxin. Correlation with Inhibition of Protein Synthesis, **L. R. Trusal** 205

Role of Transferrin in Metal Uptake by Human Lymphoblasts *In Vitro*, **F. Planas-Bohne, D. M. Taylor and J. R. Duffield** 217

Distribution of Tightly Bound Non-Histone Proteins in Chromatin Fractions obtained by DNAase II Digestion, **R. I. Lonigro, F. Altieri, P. Allegra and P. Caiafa** 223

ISSUE No. 4 OCTOBER 1985

The Relationship Between Tissue Preparation and Function; Methods for the Study of Control of Aldosterone Secretion: A Review, **G. P. Vinson, J. P. Hinson and P. W. Raven** 235

[Na-K]ATPase Activity in Proximal and Distal Tubules of the Rat Kidney: Modification and Application of a Quantitative Cytochemical Technique, **R. M. Hersey, V. H. Gattone and J. Weisz** 255

Effect of Tricyclohexylhydroxytin on Synaptosomal Ca^{2+}-Dependent ATP Hydrolysis and Rat Brain Subcellular Calmodulin, **K. S. Prasada Rao, C. S. Chetty, C. H. Trottman, J. E. Uzodinma and D. Desaiah** ... 267

Heterogeneity of Angiotensin II Receptors in Membranes of Developing Rat Metanephros, **B. Uva, M. Vallarino and P. Ghiani** 273

VOLUME CONTENTS

Effects of Protease Inhibitors on Adenylate Cyclase Activation and Aldosterone Production in Rat Adrenal Zona Glomerulosa Cells, **M. E. McAuley, P. W. Raven and G. P. Vinson** 277

Studies on Rat Liver Mitochondria. 6. The Effect of Contaminating Particles in Mitochondria Stored at 0–4°C, **I. H. Higuti, L. Y. Murata, M. Stencel, A. De Paiva Campello and A. J. Do Nascimento** 283

Formation of Activated Oxygen in the Hypoxic Rat Liver, **L. Räder, W. Siems, M. Müller and G. Gerber** 289

Differences among Primates in Defence against Infection: Sensitivity of Polymorphonuclear Leukocytes to fMet-Leu-Phe, **K. Suzuki, K. Asaoka, K. Takahashi and T. Fujikura** 297
